# Sodium Metabisulfite

## **GENERAL DESCRIPTION:**

Sodium Metabisulfite is an inorganic compound that is used in a variety of industries.

## **APPLICATIONS:**

- ◆ Food: serves as a preservative and antioxidant
- ◆ Wine/Beer: primary ingredient used in wine & beer production
- ◆ Sanitization & Cleaning
- ◆ Photography
- ◆ Waste Treatment
- ◆ Bleaching agent
- ◆ Precipitation of Gold

## **PHYSICAL PROPERTIES:**

- ◆ Appearance: Powder
- ◆ Color: White
- ◆ Odor: pungent
- ◆ pH: 3-5 @ 20°C
- ◆ Solubility in Water: 550 g/l @ 20°C

## **HANDLING & STORAGE:**

Store in well-closed containers in a cool, dark place.
